

Texas Psychiatrist

They Have Not Gone Home Yet!

Patrick Holden, MD, President, Texas Society of Psychiatric Physicians

As you know the Legislature is still in session and will not finish its business until the end of May. The Legislature can still enact much legislation in this, the 82nd session. As in years past, the impact on patient care is a mix of what has been proposed, how your Federation reacts and how the legislators respond to our feedback and suggestions. You should know that your Federation of Texas Psychiatry, and its public policy consultant, Eric Woomer, is on the job, monitoring the thousands of proposed bills. So, where does care for our patients stand at this point in the 82nd session? What have your patients received for your TSPP dues this session?

Eric has already intervened in a number of areas important to the care of our patients. As in the past the Federation prioritize the proposed bills. Priorities are set depending upon how close a bill comes to the Federation's core legislative principles. For those of the highest priority, the public policy consultant devotes all lobbying effort; for those of important interest, he monitors and helps shape the outcome; for those of lowest priority, he monitors but does not spend much time influencing the outcome.

Your Federation is most concerned about legislation that: improves access to quality psychiatric care, ends discriminatory practices toward persons with a psychiatric diagnosis, maintains fairness in the appropriate regulation of medicine and insurance / managed care industry practices and protects patients' rights and privacy. In addition, your Federation works to oppose attempts by non-physician providers to expand their scopes of practice that could be harmful to patients in need of quality psychiatric care and opposes attempts to legislatively ban or impede access to scientifically proven psychiatric treatments, denying patients of choice and interfering in the physician-patient relationship.

Here are some of the things that the Federation has accomplished so far:

Rep Brown removed from HB 3678 an onerous provision which would have directed HHSC to eliminate off-label prescribing of anti-psychotics; this was a key victory for many of us who use anti-psychotics to prevent serious harm and injury to our patients, their families and others.

Rep. Strama struck his original bill that

would have prohibited physicians from prescribing more than four medications of any kind for children in foster care; he rewrote language to reflect current HHSC rules developed through the STAR Health process regarding monitoring polypharmacy in the foster population, a process which is supported by the Federation. Again, this change was important as it meant that children with complex psychiatric problems and complicated medical histories can receive appropriate medical care.

A bill by Senator Zaffirini directing HHSC to prohibit the PRN injection of psychoactive medications with limited exceptions has been slowed and stalled. The Federation continues to educate legislators about the potential harm of this proposed legislation.

Of course, there are many things that the Federation has no control over, most prominently, the budget shortfall. This shortfall will heavily impact all areas of discretionary spending including all of various social services. As of the time of this edition, it is unknown how the Senate and House will reconcile the differences. It is unlikely that mental health care in outpatient and hospital settings will be

Patrick Holden, MD

spared; that means many of those patients will end up in other, much less appropriate settings such as emergency departments and jails, all of which are much more costly and less effective. This may lead to a repeat of the events of 2004 when a similar cost-cutting move led to overcrowded jails and emergency departments stretched beyond capacity.

While the Federation cannot change the fiscal picture of the state budget, you can rest assured that your dues will be used to vigorously intervene with legislators to prevent bad ideas from being enacted into bad practices through inappropriate regulations.

Stay tuned! ■

Children's Mental Health Awareness Week

Regina K. Cavanaugh, MD, President, Texas Society of Child and Adolescent Psychiatry

May 1-7, 2011, is National Children's Mental Health Awareness Week. Approximately 1.2 million Texas children live with mental illness, and of those, nearly 300,000 live with serious mental illness such as depressive, psychotic and bipolar disorders. Yet, the majority do not receive treatment.

A child in Texas has less of a chance to receive necessary mental health treatment than children living in any other state. Texas ranks 49th in per capita mental health funding at \$34.57 — well below the national average of \$103.53.

Our legislators recognize that untreated

Texans with serious mental illness get caught in an expensive revolving door of crisis, emergency rooms, hospitalizations and involvement in the criminal justice system. In 2007 and 2009, the Texas legislature wisely invested in a crisis mental health system to help address mental health issues upstream where the biggest savings can be realized. However, given the state's dire fiscal circumstances, spending for this fragile population is in serious jeopardy. The budget passed by the Texas House of Representatives imposed a 19% reduction in children's mental health services in the community mental health centers. The Texas Senate is proposing restoring full funding, but this still falls short of the community's needs. These centers already operate beyond their capacity, and families newly seeking services are sometimes told of waits as long as 2 to 5 years.

Additionally, despite the positive effects of crisis intervention, young Texans who present as an imminent danger to themselves and/or others, and require hospitalization, often find the state and private psychiatric hospitals at

capacity. These patients in crisis are forced to remain in emergency rooms for hours or days until a psychiatric bed is available. Many of these patients and families end up traveling outside of their county, often over 120 miles away, to receive inpatient services. This delays treatment and costs taxpayers more.

For children and adolescents, mental illness, left untreated, can lead to tragic consequences, including school drop-out, involvement with law enforcement and suicide. Suicide is the third leading cause of death for 11-18 year-olds in Texas. Almost as many teens die by suicide as those who die from all natural causes combined.

Serious mental illnesses are biologically-based illnesses that deserve the same consideration and protection as chronic medical illnesses. The good news is that when we identify and treat mental illness early, we can improve outcomes and help our youth lead productive lives. TSCAP urges the Legislature to protect this fragile population by restoring funding for state hospitals and community centers. It's a smart invest-

ment in our state's economic future.

Learn more of how you can provide children you serve with relief from the trauma of abuse and neglect, by attending the TSCAP annual summer meeting and scientific program on PTSD, July 15-17, 2011, at the Westin La Cantera, San Antonio. Don't forget, Dr. Laurence Greenhill, President of the Academy of Child & Adolescent Psychiatry, will provide a special keynote address on "Controversies in Pediatric Psychopharmacology," and will announce that San Antonio had been selected as the site for the 2015 AACAP Annual Meeting! ■

TPHP is a new confidential, non-disciplinary statewide program for physicians, physician assistants, acupuncturists and surgical assistants licensed by the Texas Medical Board. The program was created by Senate Bill 292 of the 81st Texas Legislature and is modeled on other states' programs and was a joint effort of the Texas Medical Association, the Texas Osteopathic Medical Association and the Texas Medical Board. The program is designed to protect the public by encouraging health professionals to seek assistance with drug or alcohol-related problems or mental or physical conditions that present a potentially dangerous limitation or inability to practice medicine with reasonable skill and safety.

SCIENTIFIC PROGRAM GOAL / TARGET AUDIENCE / LEARNING OBJECTIVES

This live activity has been designed in a format consisting of case study presentations, lectures and direct discussion to provide its' primary target audience of Psychiatrists, as well as other specialties of medicine, with the most up-to-date, evidence-based data that can be translated into clinical practice.

Information and data will address ethics, new developments in treatment and new directions in research to address the professional practice gaps of the learners and advance the physician's competence and effective use of targeted skills so that they may develop strategies to apply the knowledge, skills and judgement of the information presented in the educational activity into their practice.

The learning objectives for this activity have been designed to address clinician competence. Upon completion of this activity, participants should be able to:

- Demonstrate increased knowledge regarding the pathogenesis of schizophrenia, endocrine and eating disorders to increase diagnostic skills and implement appropriate management strategies.
- Discuss potential effects of evidence-based psychotherapy and apply to clinical care.
- Demonstrate increased knowledge of health care legislation aimed at reducing health care costs, improving choices, reforming liability laws to put the needs of patients first, and ensuring there are enough doctors in the public and private sector to care for America's patients and veterans.
- Identify risk factors and seek assistance for drug or alcohol-related problems or physical or mental conditions that present a potentially dangerous limitation or inability to practice medicine with reasonable skill and safety.

NEEDS ASSESSMENT

TSPP has incorporated into this CME activity the relevant educational needs concerning competence that underlie the professional practice gaps of our participants.

ACCREDITATION STATEMENT

SOME
THINGS
NEVER
CHANGE

BUT,
SOME
THINGS
DO.

The American Psychiatric Association after many years with the same company has changed to a new medical malpractice insurance carrier – and if you are currently enrolled in the old program, it is important that you know your renewal is not automatic. We also think you should be aware that there is only one malpractice program in the nation endorsed by the American Psychiatric Association where the coverage is extensive and the rates are low—American Professional Agency, Inc.

To remain enrolled in the only APA-endorsed program monitored by the Association, you must contact American Professional Agency, Inc to do so. If you are not currently enrolled or perhaps considering a change in malpractice insurance carriers, there is no better opportunity or time to change to American Professional Agency, Inc. than now.

So, regardless of when your renewal date is, or who your current carrier might be, we urge you to please visit us on the web at www.apamalpractice.com or call us toll free at 877-740-1777 and make a change for the better to American Professional Agency, Inc.
